

Sierra County Fire Protection District #1 Expresses Gratitude for Generous Donation from Sierraville Fire & Rescue Services

Sierra County Fire Protection District #1 extends its heartfelt thank you to Sierraville Fire & Rescue Services for their generous donation of \$57,987.00. This contribution has been instrumental in advancing two critical projects that enhance our firefighting capabilities and community safety.

🔧 Project One: Generator Installation at Sattley Pump House

The first initiative funded by the donation is the purchase and installation of a generator for the Sattley pump house. This vital upgrade ensures that the Fire District can continue to draw water from the well even during power outages caused by wildfires. Construction is currently underway and is expected to be completed this fall.

🚚 Project Two: Acquisition of a Water Tender

The second project involved procuring a water tender for the district—a goal that has now been successfully achieved. With many areas in our community located far from fire hydrants, this new equipment significantly boosts our ability to deliver large volumes of water to fire scenes, improving response times and effectiveness.

🌲 Strategic Preparedness for Wildfire Season

Both projects align with our strategic plan to strengthen firefighting services, especially as wildfires have become an annual challenge. The support from Sierraville Fire & Rescue Services exemplifies the power of community collaboration in meeting these growing demands.

We are deeply grateful to our neighbors and partners who continue to step up and support our mission. Thank you once again to Sierraville Fire & Rescue Services for your commitment to public safety and for helping us protect Sierra County.
